AI against Carbon Impact Certificate

Classify bank transactions with NLP to estimate their carbon impact

This certificate is proudly presented to

Micah Buuck

For successfully developing large language models capable of accurately classifying bank transactions in more than 90 classes. In the Challenge the participants performed data engineering and build a pipeline for the training and testing of various NLP models

This participant received the following skills:

Foundation	AI Core	AI in Practice	AI Application	Soft skills
Programming basics	Data enriching	Design pitfalls	Text classification	Leadership
Git	Feature engineering	Training pipelines		Organization
Numpy	ML basic concepts			Teamwork
Pandas	ML goals			Interpersonal relations
	Common algorithms			Self-management
	Sklearn			Mindset
	DL basic concepts			Creativity
	Pitfalls			
	+2 more
